

100%

RECYCLABLE! Deposit @ 1850+

A (VERY) COOL ALTERNATIVE

With so many Cold Chain products on the market, it can be challenging to understand which products are best suited to your business. For over 30 years, we have worked with brands from an array of industries to create Cold Chain Solutions that are tested and validated for thermal performance. Sancell's Silver Sheen Eco Liners and Bags paired with ProtectaChill Gel Packs are the ultimate Australian made and 100% recyclable Cold Chain Solution.

REFLECTIVE OUTER LAYER

Reflects radiant heat flow

BUBBLE INNER LAYER

Acts as an air barrier which reduces heat transfer and conductivity

LIGHTWEIGHT

Reduces overall parcel weight for more economical shipping

100% RECYCLABLE

Approved for recycle in REDcycle bins located at supermarkets across Australia. Visit **www.redcycle.net.au** for locations.

DEPOSIT FOR RECYCLING **IN RED**cycle BINS at 1850+ SUPERMARKETS AROUND AUSTRALIA!

CONSIDER A SANCELL THERMAL SOLUTION IN PLACE

PLA (Polylactic Acids)

Derived from Corn Starch and Sugar Cane, PLA and other Bioplastic products are increasingly finding their way into the Australian Packaging landscape. While claims are often made that these products are biodegradable and compostable, they require commercial processing

sites which are not easily accessible to the everyday Australian products are produced offshore and imported, diverting manufacturing jobs away from hard-working Australians.

× Produced offshore & imported

× Not easily recycled

Polystyrene (EPS)

While it's cooling credentials might be hot, its environmental credentials certainly are not! Polystyrene is an extremely rigid product which is not easily recycled, taking up significant volume within landfill sites. This product has become such

a problem that its being phased out as loose fill packaging and food and beverage containers in 2022, as outlined in the Australian National Plastics Plan 2021.

- × Extremely rigid
- x Phasing out in 2022
- Not easily recycled x Space-consuming

Paper

General perception within the market would think paper is the most environmentally friendly packaging solution. However, the manufacturing process of paper contributes to 80% more greenhouse gases, 4 times as much energy and 50 times more water pollutants than plastic. It takes **91% less energy** to recycle 0.5kgs of plastic than to recycle 0.5kg of paper. Once paper is collected, sorted by a machine, sorted by hand

to remove all non-paper items, washed, turned into sludge, purified, poured, flattened, dried, bleached, cut and packaged, its finally ready to go!

× Complex to recycle

Natural Fibre Carton Liners A '100% natural' and compostable product seems ideal, however, these these bulky liners are **not easily recycled or disposed** with customers

confused as to where and how to sustainably dispose. The every day customer is not equipped to compost an average of 375g of insulating natural fibre liners that regularly arrive with deliveries. As a result, large numbers are likely to end up in general waste and ultimately landfill.

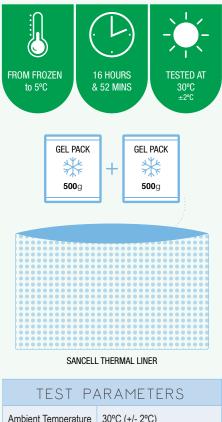

✗ Bulky & Heavy

× Not easily composted

16+ HOURS

Using 2 x 500g Gel Packs inside a Sancell Thermal Liner the temperature remained under 5°C for 16 Hours and 52 minutes

	Amplent remperature	30°C (+/- 2°C)
	Specifications	2 x 500g Gel Packs sealed inside a Sancell Thermal Liner
	RESULTS	
	Start Temperature	-21°C
	FinishTemperature	5°C
	Lapsed Time	16 Hours & 53 Minutes

Data loggers are used to record time against temperature

25+ HOURS

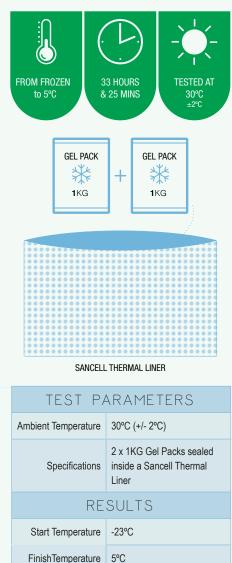

Using 2 x 750g Gel Packs inside a Sancell Thermal Liner the temperature remained under 5°C for 25 Hours and 32 minutes

Gel Packs are tested inside a Thermal Liner, inside a shipping carton

33+ HOURS

Using 2 x 1KG Gel Packs inside a Sancell Thermal Liner the temperature remained under 5° C for 33 Hours and 25 minutes

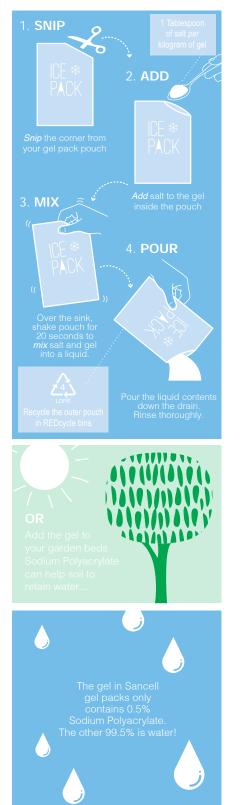

Lapsed Time 33 Hours & 25 Minutes

Tests are carried out using a temperature control chamber set to ambient temperature 30°C

TEST RESULTS

HOW CAN I DISPOSE OF GEL PACKS SAFELY?

SANCELL GEL PACKS

NON-TOXIC

Sancell ProtectaChill[™] gel packs are safe for use with food, seafood, pathology samples and temperature sensitive pharmaceuticals. Each pack contains a non-toxic sodium polyacrylate gel inside. Should the unexpected happen and the gel contents come into contact with skin or food, the gel will cause no harm. We do advise to immediately wash gel from skin or food. The contents should not to be ingested.

.

FRBe

DTECTA

NO PUNCTURES or TEARS Made from Australian Made quality virgin material, our outer tubing is engineered not to tear or puncture.

.

**

ISO

All Sancell products are manufactured under ISO accredited systems in OH&S, Environment and Quality.

MADE IN AUSTRALIA

All ProtectaChill[™] gel packs are proudly made at our manufacturing facilities in Melbourne and Sydney. Dual manufacturing sites gives us the versatility to move our gel packs around the country quickly and efficiently as well as giving us flexibility with supply.

Locally made gel packs means we are always in control of quality and production. We only use quality Australian made outer tubing, cartons and labels.

RECYCLABLE

The outer tubing of each gel pack is made from Low Density Polyethylene (LDPE4) and is 100% Recyclable. Safely dispose of the gel contents as per our guidelines (left). The outer tubing can then be deposited into REDcycle bins located in 1850+ major supermarkets around Australia. Once processed and recycled, the outer case can become a plant pot, park bench or even another form of packaging one day!

ROBUST SEALS

.

High strength seals provide superior durability ensuring no leaks and preventing any splits.

RECYCLABLE LDPE4 outer. Suitable for recycling in 1850+ REDcycle Bins in supermarkets Australia wide.

YOUR NAME HERE! Place your brand in the hand of every customer! Ask about our custom print options.

SUITABLE FOR REUSE

ProtectaChill™ gel packs are suitable for reuse. Each pack is made using robust, Australian manufactured tubing, designed to resist splitting and puncturing. Packs should be cleaned and sanitised thoroughly before being re-used. If a gel pack does begin to leak, it should be disposed of immediately and thoughtfully as per our guidelines (left).

Storage Savings

Less Recycling Space

Transportation Savings

A Special Blend

A proprietary blend of locally sourced aluminum particulates are embedded into each layer, to not only trap the cold in but defend any heat from entering. Along with a minimum of 40% recycled content in every bag, Silver Sheen is approved for recycle through the REDcycle program. With multiple layers fighting to protect your temperature sensitive goods, it really is your knight in shining armour!

The Eco Difference

Silver Sheen Eco is specifically engineered to optimise material value and minimise impacts on the environment. Silver Sheen Eco is made from 100% locally sourced materials and is 100% locally made. The lower profile requires less energy and fossil fuels to transport, as well as less space to store, transport and recycle. The 1mm structure also allows you to expel unnecessary air from your package, maximising thermal performance. Make a real environmental difference by choosing Silver Sheen Eco!

Locally Sourced Materials

100% Recyclable LDPE4

THE NEXT GENERATION THERMAL PROTECTOR! SILVER SHEEN ECO IS LOCALLY SOURCED, AUSSIE MADE AND TAKES UP 75% LESS SPACE THAN SILVER SHEEN AIR!

How it Works

The best part about Silver Sheen Eco and Silver Sheen Air is that you will receive the highest level of thermal protection, no matter your choice! When paired with Sancell's ProtectaChill Gel Packs, Silver Sheen Eco and Silver Sheen Air have you covered for over 25 hours!*

* 500g Gel Pack Solution and Carton tested in ambient temperature of 30°C

More than a Thermal Protector

Get the best of both worlds! The 10mm bubble in Silver Sheen Air provides an extra layer of plush cushioning for those goods that need protection during transit. Silver Sheen Air minimises product damage, reduces the complex and time consuming processes of returns, and not to mention replacement costs. All while keeping your goodies cold!

Doing Our Bit

All Sancell products are manufactured under an ISO 14001 Environmental Management System. We are proud members of APCO, ANZPAC and signatories of the Victorian Government TAKE2 initiative for climate change.

- ✓ 100% Recyclable LDPE4
- ✓ Made from 30% Recycled Content
- ✓ REDcycle Approved
- / 25% Green Power Renewable Energy
- 🗸 Australian Made
- / Lower Carbon Footprint

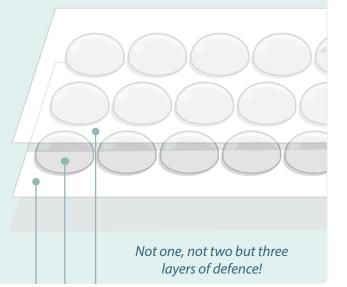

Trusted Over 30 Years Industry Manufacturing Professionals Experience

1 Million Thermal Liners Sold Each Year

With embedded layers of defence, Silver Sheen Air just makes sense!

EnviroTherm is an innovative new reflective film made from **LDPE 4** with several key environmental benefits.

Key benefits:

- EnviroTherm liners are widely accepted by post industrial recycling schemes.
- Suitable for disposal at over 1850+ supermarket locations Australia wide for recycling through the **REDcycle** program.
- Sancell recycles all EnviroTherm production waste in-house allowing us to re-purpose through adding a **minimum 20% recycled** content into all EnviroTherm products.
- We are **APCO** members and EnviroTherm is produced in compliance with **ISO 14001** management systems, assuring our customer of our commitment to continuous improvement.
- High quality product offering maximum thermal protection to ensure your goods arrive in perfect condition without spoilage.

Available in two options:

Padded thermal insulating liner.

Bubble layer provides cushioning impact protection for delicate goods in transit.

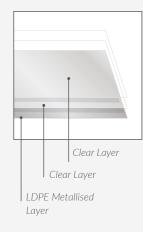

Maximum thermal protection.

Sancell.

Compact thermal insulating liner.

Freight and storage savings.

Maximum thermal protection.
