

# Removalist & Freight

## Protective Packaging Solutions

**Shipping overseas or storing long term?** Have **oversize items** or **delicate surfaces?** Simple bubble wrap may not provide the level of protection required and can leave marks on surfaces in these conditions. Our exclusive, purpose engineered surface and freight protection products contain specialised films that resist punctures and tears while preventing scratching and marking on vulnerable surfaces.

MADE WITH  
RECYCLED CONTENT

## Environmental Management

All Sancell products are manufactured under an **ISO 14001 Environmental Management System** utilising circular economy principles. Members of **APCO** and the Victorian Government **TAKE2** initiative for climate change, our commitment to sustainability, waste reduction and reduced carbon omissions is evident through everything we do.

Packaging products are made with a **minimum 15% recycled content** using our own in-house recycling machines.

Predominantly made from LDPE4, our products are **light weight**, requiring minimal resources to produce and transport, **100% recyclable**, widely accepted by post industrial recycling schemes and suitable for deposit at 1800+ supermarkets nation wide for recycling.

## Contact Us

Our in-house suite of conversion equipment gives us the unique capability to **customise** our products into a wide range of **specialty formats** with **custom printing** also available . With over 30 years experience developing, manufacturing and tailoring high quality protective packaging systems, we can help not only **minimise damage and breakages in storage and transit** but also **maximise packing efficiencies** and reduce the amount of packaging materials required, helping to minimise both costs and environmental impact.

## Recovery Bubble

Sancell recovery bubble wrap is the perfect **all purpose bubble wrap** suited to a wide variety of applications providing **impact protection**. Supplied on **economical 115m rolls** saving on environmental and financial transport costs.

## Anti-static

A must for use for the **safe transport of electronic equipment** and components by effectively reducing surface conductivity while providing **impact protection**. Sancell anti-static bubble is independently tested twice a year.

## PE Foam Wrap

PE foam wrap is soft, light and **cost effective** alternative to bubble wrap. Provides **impact protection**, is **non marking** and suitable for **long term storage**. Available in a wide range of thicknesses from 0.5mm to 10mm, we have a foam wrap for any application.

## ProtectaSoft

An **economical, soft and pliable**, all purpose wrap. **Non marking** inner layer suitable for **long term storage** and designed to protect **delicate surfaces** such as **fine art** from marking while bubble layer offers **impact protection**.

## Bubble Laminated Foam

General purpose wrap with bubble layer for **impact protection** and **non marking** 0.5mm foam layer. Suitable for **long term storage** and use on **sensitive surfaces** such as **highly polished chrome** or stainless steel.

## ProtectaWrap

Purpose engineered removalist wrap in Light to Heavy Duty grades featuring **puncture and tear resistant** outer layer and **non marking** inner layer suitable for **long term storage**. Effective **all purpose** removalist and freight protection.

## PW Pro

Heavy duty **flooring protection** for building and construction sites. Features **tear resistant** non slip **high density weave top layer** and soft **non marking** foam bottom layer.

## ArmourWrap

Top of the range superior protection for delicate and valuable freight items such as **fine art** and **high end furnishings**. Features **extra tough** silky smooth **puncture and tear resistant** matte white outer layer and **non marking** transmission film inner layer.

## EnviroTherm

LDPE4 metallised layer provides **thermal insulating** protection for shipping **temperature sensitive goods** such as food, medicine, cosmetics and much more.

## Corner Pieces

Made from our popular **Protect Wrap**, these self adhesive corner pieces provide **impact protection** where its needed most. Suitable for use with frames and furniture corners.

## Specialty Conversion
