

EnviroTherm is a reflective film which is 100% recyclable and is suitable for disposal at over 1800 supermarket bins Australia wide for recycling and re-purposing.

The result is an innovative product with several key environmental benefits over standard thermal liners.

Key benefits:

- Sancell recycles all EnviroTherm production waste in-house allowing us to add a minimum 20% recycle into all EnviroTherm products.
- Widely accepted by post industrial recycling schemes.
- EnviroTherm is produced in compliance with ISO 14001 management systems assuring our customer of our commitment to continuous improvement.
- High quality product offering maximum thermal padded protection to ensure your goods arrive in perfect condition without spoilage.

Curbside soft plastic collection is just around the corner!

With successful ongoing trials underway since 2016 in various municipalities across Victoria, curbside collection of soft plastics is primed for imminent expansion across the country.

Switch to EnviroTherm liners now for the most cost effective and environmentally sustainable thermal packaging system available and truly close the loop for a circular economy.

Validation & Testing

Our in-house test facility has carried out more than 50 temperature profiling tests allowing us to offer customised thermal solutions for our customers specific needs.

16+ hrs

TEST PARAMETERS	
Ambient Temperature	30°C (+/- 2°C)
Specifications	Sancell cold chain solution including ProtectaChill gel ice packs and EnviroTherm liner.
RESULTS	
Start Temperature	-21°C
Finish Temperature	5°C
Lapsed time	16 hours & 53 Minutes

25+ hrs

TEST PARAMETERS	
Ambient Temperature	30°C (+/- 2°C)
Specifications	Sancell cold chain solution including ProtectaChill gel ice packs and EnviroTherm liner.
RESULTS	
Start Temperature	-23°C
Finish Temperature	5°C
Lapsed time	25 hours & 32 Minutes

33+ hrs

TEST PARAMETERS	
Ambient Temperature	30°C (+/- 2°C)
Specifications	Sancell cold chain solution including ProtectaChill gel ice packs and EnviroTherm liner.
RESULTS	
Start Temperature	-23°C
Finish Temperature	5°C
Lapsed time	33 hours & 25 Minutes

Customisation Options

- We can collaborate with you to find the perfect solution for your unique requirements.
- Customise your thermal liner size to suit and any size box, with or without flap and tape.
- Enhance your brand and customer experience with custom printed liners and gel packs.

Australian Made

- High quality products made to strict Australian manufacturing standards.
- Benefit from reduced transport costs, shorter lead times, lower moqs and easier communication.
- Support jobs and economic development in Australia.
